## Executive Summary

On June 25, 2024, the Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA), Region 6, evaluated the Plume Exposure Pathway Exercise for River Bend Station (RBS), located near St. Francisville, Louisiana.

During the RBS exercise, FEMA evaluated the ability of State and local officials to implement plans and procedures to protect the public in the event of a radiological incident. This exercise was part of the FEMA Radiological Emergency Preparedness Program. This program ensures adequate capabilities exist to prevent, protect against, mitigate the effects of, respond to, and recover from incidents involving commercial nuclear power plants. The exercise implemented the revised NUREG 0654/FEMA-REP-1, Rev. 2 document and the 2019 Radiological Emergency Preparedness Program Manual. The last Plume Exposure Pathway Exercise was on October 22, 2023.

This report contains the final written evaluations of the exercise. The State and local organizations demonstrated knowledge of their emergency response plans and procedures and adequately implemented them. There were no Plan Issues, Level 1, or Level 2 Findings during the exercise.

## Section 1: Exercise Overview

Name	2024 RBS Plume Exposure Pathway Exercise
Date	June 25, 2024
Purpose	Through a simulated scenario, this exercise evaluated the Offsite Response Organizations' (ORO) decision-making, communication, and collaboration skills in managing a radiological emergency.
Mission Area(s)	Protection Response
Core Capabilities	Operational Coordination Environmental Response/Health and Safety Operational Communications Public Information and Warning Operational Communications Public Information and Warning Planning
Objectives	Emergency Operations Management Exposure Control Alert and Notification Detect, Measure, Sample, Analyze and Assess Operate
Threat or Hazard	Release of radiological materials from a commercial nuclear power plant.
Scenario	Plume Exposure Pathway Exercise
Participating Organizations	A complete list of participating agencies and organizations is attached in Appendix A.

## Section 2: Analysis of Capabilities

### 2.1 Summary Results of Assessment

Table 1 below includes the assessment activity objectives, capability targets, selected core capabilities, and status of each capability target evaluated during the RBS Plume Exposure Pathway Exercise.

Each jurisdiction and functional entity were evaluated based on the demonstration of core capabilities and capability targets. Capability targets are listed, and the demonstration status of those capability targets are indicated by the use of the following terms:

- **Met (M):** The jurisdiction or functional entity performed all activities under the objective/capability target to the level required per the work plan and/or the extent of play agreement, with no Level 1 or Level 2 Findings evaluated under that objective/capability target during the current activity and no unresolved prior Level 2 Finding(s).
- **Level 1 Finding (L1):** An observed or identified inadequacy of organizational performance during an assessment activity that could cause a determination that offsite emergency preparedness is not adequate to provide reasonable assurance that appropriate protective measures can be taken in the event of a radiological emergency to protect the health and safety of the public living in the vicinity of a nuclear power plant.
- **Level 2 Finding (L2):** An observed or identified inadequacy of organizational performance during an assessment activity that is not considered, by itself, to adversely impact public health and safety.
- **Plan Issue (P):** An observed or identified inadequacy in the OROs emergency plan/implementing procedures, rather than in that of the OROs performance.
- **Not Demonstrated (N):** For a justifiable reason, the jurisdiction or functional entity did not perform assessment activities under the objective/capability target as specified in the extent of play agreement.
- **Not Applicable (N/A):** The objective/capability target does not apply to the jurisdiction.
