Reference: Annual Letter of Certification Report - 2013

Dear Mr. Brown:

Thank you for providing us with the information necessary to complete our review of the January 30, 2014 submittal of the Annual Letter of Certification Report for the state of California, Diablo Canyon Power Plant (DCPP), and San Onofre Nuclear Generating Station (SONGS).

This submittal, along with the assertion that all requisite activities have been undertaken or completed as appropriate by the State and local response organizations, meets the intent of Section C of the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) Guidance Memorandum PR-1, Policy on NUREG-0654/FEMA Radiological Emergency Preparedness (REP) - 1, and 44 Code of Federal Regulations § 350.5.

The FEMA Region IX National Preparedness Division, Technological Hazards Branch, in cooperation with your staff, has reviewed the submitted documentation for the state of California, DCPP, and SONGS. Utilizing the planning standards set forth in NUREG-0654/FEMA REP-1 and the FEMA REP Program Manual, June 2013, all requirements for the 2013 Annual Letter of Certification review have been satisfied.

Please contact Site-Specialist Alberto Sifuentes directly at (510) 627-7108 should you have any comments or questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard Grundstrom", is written over a horizontal line.

Richard Grundstrom
