Reference: Annual Letter of Certification Report - 2015

Dear Mr. Brown:

Thank you for providing us with the information necessary to complete our review of the January 29, 2016 submittal of the Annual Letter of Certification (ALC) Report for the state of California's radiological emergency preparedness program for the Emergency Planning Zone around Diablo Canyon Power Plant (DCPP) and San Onofre Nuclear Generating Station (SONGS).

The Federal Emergency Management Agency Region IX National Preparedness Division, Technological Hazards Branch has reviewed and found the submitted and supporting documentation, along with the assertion that all requisite activities have been undertaken or completed, as appropriate, by the State and local response organizations meets the intent of Part IV: Program Administration of the Radiological Emergency Preparedness Program Manual, July 2015, and Title 44 Code of Federal Regulations § 350.5 Periodic Requirements.

We have continued reasonable assurance that the health and safety of the public continues to be protected in the event of a radiological emergency at DCPP or SONGS. All requirements for the 2015 ALC review have been satisfied.

Should you have any questions, please call me directly at (510) 627-7240, or your staff may contact my DCPP/SONGS site-specialist Alberto Sifuentes at (510) 627-7108. Thank you for coordinating this submission.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard Grundstrom", is written over a horizontal line.

Richard Grundstrom
