March 8, 2024

Stephen C. McCraney, Executive Director
Mississippi Emergency Management Agency
Post Office Box 5644
Pearl, Mississippi 39208

Dear Director McCraney:

The Mississippi Radiological Emergency Preparedness Program Annual Letter of Certification for the Grand Gulf Nuclear Station dated December 20, 2023, for calendar year 2023 is approved.

The FEMA Region 4 Technological Hazards Branch staff reviewed your Annual Letter of Certification, supporting documentation, and activities for calendar year 2023. Each statement was found to be adequately documented and accurately reflected all that the state of Mississippi and Grand Gulf specific counties did and continue to do to protect health and safety in the unlikely event of a radiological incident.

My staff and I look forward to continuing our partnership in building and sustaining the emergency preparedness and response capabilities in the state of Mississippi and the communities surrounding the Grand Gulf Nuclear Station.

If you have any questions, please contact JT Ackermann at john.ackermann@fema.dhs.gov, the designated Section Chief for the states of Tennessee, Georgia, North Carolina, and Mississippi.

Sincerely,

Kevin B. Wells
Chief, Technological Hazards Branch
Regional Assistance Committee Chairperson
