February 21, 2024

James C. Stallings, Director  
Georgia Emergency Management  
and Homeland Security Agency  
935 United Avenue, SE  
Atlanta, Georgia 30316

Dear Director Stallings:

The Georgia Radiological Emergency Preparedness Program Annual Letter of Certification dated January 30, 2024, for calendar year 2023 is approved.

The FEMA Region 4 Technological Hazards Branch staff reviewed your Annual Letter of Certification, supporting documentation, and activities for calendar year 2023. Each statement was found to be adequately documented and accurately reflected all that the state of Georgia and counties did and continue to do to protect health and safety in the unlikely event of a radiological incident.

My staff and I look forward to continuing our partnership in building and sustaining the emergency preparedness and response capabilities in the state of Georgia and the counties surrounding the Edwin I. Hatch Nuclear Plant and Alvin W. Vogtle Electric Generating Plant.

If you have any questions or concerns, please contact J.T. Ackermann at (404) 695-2334, my designated Section Chief for the state of Georgia.

Sincerely,

Kevin B. Wells  
Chief, Technological Hazards Branch  
Regional Assistance Committee Chairperson
