

FEMA

February 22, 2024

Kim Stenson, Director
SC Emergency Management Division
2779 Fish Hatchery Road
West Columbia, South Carolina 29172

Dear Director Stenson:

The South Carolina Radiological Emergency Preparedness Program Annual Letter of Certification dated January 30, 2024, for calendar year 2023, is approved.

The FEMA Region 4 Technological Hazards Branch staff reviewed your Annual Letter of Certification, supporting documentation, and activities for calendar year 2023. Each statement was found to be adequately documented and accurately reflected all that the state of South Carolina and counties did and continue to do to protect health and safety in the unlikely event of a radiological incident. Our FEMA site specialists will coordinate technical assistance visits with your staff to resolve any questions we may have.

My staff and I look forward in continuing our partnership in building and sustaining the emergency preparedness and response capabilities in the state of South Carolina and the counties surrounding the Catawba Nuclear Station, Oconee Nuclear Station, H.B. Robinson Nuclear Plant, and V.C. Summers Nuclear Station.

If you have any questions or concerns, please contact Robert Spence at (707) 220-3177, my designated Section Chief for the states of Alabama, Florida, and South Carolina.

Sincerely,

Kevin B. Wells
Chief, Technological Hazards Branch
Regional Assistance Committee Chairperson
