## Military Department

### OFFICE OF THE ADJUTANT GENERAL

R. Van McCarty,  
MAJOR GENERAL,  
THE ADJUTANT GENERAL

January 22, 2020

Mr. Kevin Wells  
Technological Hazards Branch  
Department of Homeland Security, Reg. IV  
3003 Chamblee-Tucker Road  
Atlanta, GA 30341

Dear Mr. Wells:

The State of South Carolina has met radiological emergency preparedness (REP) planning and preparedness requirements for calendar year 2020 as described in the following Annual Letter of Certification (ALC) and associated documents. Activities required by NUREG-0654, FEMA REP-1, and 44 CFR 350 have been undertaken and/or completed by the state and local organizations for the following functions:

- Update of Plans and Letters of Agreement
- Public Education and Information
- Radiological Emergency Response Training
- 24-Hour Staffing
- Emergency Facilities and Equipment
- Drills

Due to significant change over in staff and the virtual environment caused by COVID-19, the quarterly V.C. Summer Nuclear Station decision line checks were not completed for one quarter in 2020. In order to address this issue, South Carolina Emergency Management Division has scheduled quarterly checks for 2021 to ensure all ALC requirements are met.

If you have any questions or require additional information, please have your staff contact Danilyn Bock at 803-521-0975.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Stenson".

Kim Stenson  
Director

KS/db
