

FEMA

February 21, 2024

Patrick C. Sheehan, Director
Tennessee Emergency Management Agency
3041 Sidco Drive
Nashville, Tennessee 37204

Dear Director Sheehan:

The Tennessee Radiological Emergency Preparedness Program Annual Letter of Certification dated January 29, 2024, for calendar year 2023 is approved.

The FEMA Region 4 Technological Hazards Branch staff reviewed your Annual Letter of Certification, supporting documentation, and activities for calendar year 2023. Each statement was found to be adequately documented and accurately reflected all that the state of Tennessee and counties did and continues to do to protect health and safety in the unlikely event of a radiological incident.

My staff and I look forward to continuing our partnership in building and sustaining the emergency preparedness and response capabilities in the state of Tennessee and the counties surrounding the Sequoyah Nuclear Plant and Watts Bar Nuclear Plant.

If you have any questions or concerns, please contact J.T. Ackermann at (404) 695-2334, my designated Section Chief for the state of Tennessee.

Sincerely,

Kevin B. Wells
Chief, Technological Hazards Branch
Regional Assistance Committee Chairperson
